The diagram is a detailed floor plan of a building, showing the layout of various rooms and the installation of electrical and plumbing systems. The plan includes a kitchen area with a sink, stove, and refrigerator; a living area with a fireplace and TV; a bedroom with a bed and wardrobe; and a bathroom with a toilet and shower. The plan also shows a staircase and a balcony. Various electrical symbols and dimensions are used throughout the plan to indicate the location and specifications of the installations.

Key features and labels include:

- Boucle Sanitaire 2/1/200**: A label for a specific plumbing loop.
- Led 203** and **Led 204**: Labels for lighting fixtures.
- Boucle sanitaire 200**: A label for another plumbing loop.
- Meux**: A label for a specific area or feature.
- Installation**: A label for the overall system.

The plan also includes a legend (Légende) on the left side, which defines the symbols used for various electrical and plumbing components, such as switches, outlets, lights, and fixtures. The legend is organized into a table with two columns: the first column contains the symbols, and the second column contains their corresponding names in French.
