This architectural drawing shows a side elevation of a door frame assembly. The main vertical element is the door leaf, which has a height dimension of 600. To its right is the door jamb or frame, with a total width dimension of 72. The door leaf itself has a width dimension of 115. On the left side, there are two horizontal dimensions: 28 at the top and 28 at the bottom, likely indicating the thickness of the wall or the offset of the frame from the wall face. A small square symbol is located near the top-left corner of the door leaf, possibly indicating a hinge location. The entire assembly is shown within a larger rectangular context, with additional dimensions like 518 and 9 visible on the far left edge.
